Total Points from Self-Assessment: 311/312

		Self Assesment		
Grading Points	**Sumeet**	**Shashank**	**Xiaoqin**	**Links**
workload is spread over the whole team (one team member is often Xtimes more productive than the others... but nevertheless, here is a track record that everyone is contributing a lot)	3	3	3	Contributor Stats
Number of commits	3	3	3	commit stats
Number of commits: by different people	3	3	3	commit stats
Issues reports: there are many	3	3	3	bug reports
issues are being closed	3	3	3	closed tasks
Docs: doco generated , format not ugly	3	3	3	README.md
Docs: what: point descriptions of each class/function (in isolation)	3	3	3	README.md
Docs: how: for common use cases X,Y,Z mini-tutorials showing worked examples on how to do X,Y,Z	3	3	3	README.md
Docs: why: docs tell a story, motivate the whole thing, deliver a punchline that makes you want to rush out and use the thing	3	3	3	README.md
Docs: short video, animated, hosted on your repo. That convinces people why they want to work on your code.	3	3	3	Video_at_readme_page
Use of version control tools	3	3	3	codecov
test cases exist	3	3	3	test directory
test cases are routinely executed	3	3	3	Git Action
issues are discussed before they are closed	3	3	3	Discord, GH comments
Chat channel: exists	3	3	3	Discord
test cases:.a large proportion of the issues related to handling failing cases.	3	3	3	Issues
evidence that the whole team is using the same tools: everyone can get to all tools and files	3	3	3	Use of Github throughout with frequent commits
evidence that the whole team is using the same tools (e.g. config files in the repo, updated by lots of different people)	3	3	3	requirements.txt
evidence that the whole team is using the same tools (e.g. tutor can ask anyone to share screen, they demonstrate the system running on their computer)	3	3	3	All project are ran from master with same requirements
evidence that the members of the team are working across multiple places in the code base	3	3	3	commits
short release cycles	3	3	3	Releases
The file .gitignore lists what files should not be saved to the repo. See examples	3	3	3	Gitigmore
The file INSTALL.md lists how to install the code	3	3	3	Install.md
The file LICENSE.md lists rules of usage for this repo	3	3	3	LICENCE
The file CODE-OF-CONDUCT.md lists rules of behavior for this repo; e.g. see example	3	3	3	CodeofConduct
The file CONTRIBUTING.md lists coding standards and lots of tips on how to extend the system without screwing things up; e.g. see example	3	3	3	Contributing.md
The file README.md contains all the following	3	3	3	Readme.md
Video	3	3	3	video
DOI badge: exists. To get a Digitial Object Indentifier, regiser the project at Zenodo. DOI badges look like this: Zenodo doi badge	3	3	3	https://zenodo.org/records/14026736
Badges showing your style checkers	3	3	3	(README.md)[https://github.com/sumeetkhillare/WolfLease/blob/master/README.md]
Badges showing your code formatters.	3	3	3	(README.md)[https://github.com/sumeetkhillare/WolfLease/blob/master/README.md]
Badges showing your syntax checkers.	3	3	3	(README.md)[https://github.com/sumeetkhillare/WolfLease/blob/master/README.md]
Badges showing your code coverage tools	3	3	3	(README.md)[https://github.com/sumeetkhillare/WolfLease/blob/master/README.md]
Badges showing any other Other automated analysis tools	3	3	3	(README.md)[https://github.com/sumeetkhillare/WolfLease/blob/master/README.md]
Does your website and documentation provide a clear, high-level overview of your software?	3	3	3	README.md
Does your website and documentation clearly describe the type of user who should use your software?	3	3	3	README.md
Do you publish case studies to show how your software has been used by yourself and others?	3	3	3	README.md
Is the name of your project/software unique?	3	3	3	WolfLease
Is your project/software name free from trademark violations?	3	3	3	Yes
Is your software available as a package that can be deployed without building it?	3	3	3	Docker package
Is your software available for free?	3	3	3	Yes
Is your source code publicly available to download, either as a downloadable bundle or via access to a source code repository?	3	3	3	Yes
Is your software hosted in an established, third-party repository like GitHub (https://github.com), BitBucket (https://bitbucket.org),LaunchPad (https://launchpad.net) orSourceForge (https://sourceforge.net)?	3	3	3	repo
Is your documentation clearly available on your website or within your software?	3	3	3	README.md
Does your documentation include a "quick start" guide, that provides a short overview of how to use your software with some basic examples of use?	3	3	3	README.md
If you provide more extensive documentation, does this provide clear, step-by-step instructions on how to deploy and use your software?	3	3	3	INSTALL.md
Do you provide a comprehensive guide to all your software's commands, functions and options?	3	3	3	README.md
Do you provide troubleshooting information that describes the symptoms and step-by-step solutions for problems and error messages?	3	3	3	README.md
If your software can be used as a library, package or service by other software, do you provide comprehensive API documentation?	3	3	3	README.md
Do you store your documentation under revision control with your source code?	3	3	3	Yes README.md
Do you publish your release history e.g. release data, version numbers, key features of each release etc. on your web site or in your documentation?	3	3	3	releases
Does your software describe how a user can get help with using your software?	3	3	3	README.md
Does your website and documentation describe what support, if any, you provide to users and developers?	3	3	3	CONTRIBUTING.md
Does your project have an e-mail address or forum that is solely for supporting users?	3	3	3	CONTRIBUTING.md
Are e-mails to your support e-mail address received by more than one person?	3	3	3	yes
Does your project have a ticketing system to manage bug reports and feature requests?	3	3	3	yes project
Is your project's ticketing system publicly visible to your users, so they can view bug reports and feature requests?	3	3	3	yes project
Is your software's architecture and design modular?	3	3	3	Commands and features are separate from each other in general.
Does your software use an accepted coding standard or convention?	3	3	3	Pylint used
Does your software allow data to be imported and exported using open data formats? *	3	3	3	N/A
Does your software allow communications using open communications protocols? *	3	3	3	N/A: Discord-specific program
Is your software cross-platform compatible?	3	3	3	Yes
Does your software adhere to appropriate accessibility conventions or standards? *	3	3	3	website has ui for user interactions
Does your documentation adhere to appropriate accessibility conventions or standards? *	3	3	3	Mostly text-based, some screenshots which may not be accessible
Is your source code stored in a repository under revision control?	3	3	3	yes
Is each source code release a snapshot of the repository? *	3	3	3	yes relaese
Are releases tagged in the repository? *	3	3	3	yes relaese
Is there a branch of the repository that is always stable? (i.e. tests always pass, code always builds successfully)	3	3	3	Master branch is always kept stable by restrciting direct commits to master

Do you back-up your repository?	3	3	3	Github and cloned repo's developers worked on
Do you provide publicly-available instructions for building your software from the source code?	3	3	3	INSTALL.md
Can you build, or package, your software using an automated tool?	3	3	3	We can do this using Docker
Do you provide publicly-available instructions for deploying your software?	3	3	3	INSTALL.md
Does your documentation list all third-party dependencies?	3	3	3	requirements_v2.txt
Does your documentation list the version number for all third-party dependencies?	3	3	3	requirements_v2.txt
Does your software list the web address, and licences for all third-party dependencies and say whether the dependencies are mandatory or optional?	3	3	3	requirements_v2.txt
Can you download dependencies using a dependency management tool or package manager?	3	3	3	requirements_v2.txt listed, evidenced in use of Github Actions
Do you have tests that can be run after your software has been built or deployed to show whether the build or deployment has been successful?	3	3	3	tests
Do you have an automated test suite for your software?	3	3	3	Github Actions
Do you have a framework to periodically (e.g. nightly) run your tests on the latest version of the source code?	3	3	3	Github Actions
Do you use continuous integration, automatically running tests whenever changes are made to your source code?	3	3	3	Github Actions
Are your test results publicly visible?	3	3	3	Github Actions
Are all manually-run tests documented?	3	3	3	All test cases are automated and documented
Does your project have resources (e.g. blog, Twitter, RSS feed, Facebook page, wiki, mailing list) that are regularly updated with information about your software?	2	2	2	N/A
Does your website state how many projects and users are associated with your project?	3	3	3	README.md
Do you provide success stories on your website?	3	3	3	README.md
Do you list your important partners and collaborators on your website?	3	3	3	Insights
Do you list your project's publications on your website or link to a resource where these are available?	3	3	3	Releases
Do you list third-party publications that refer to your software on your website or link to a resource where these are available?	3	3	3	N/A
Can users subscribe to notifications to changes to your source code repository?	3	3	3	yes
If your software is developed as an open source project (and, not just a project developing open source software), do you have a governance model?	3	3	3	yes
Do you accept contributions (e.g. bug fixes, enhancements, documentation updates, tutorials) from people who are not part of your project?	3	3	3	yes
Do you have a contributions policy?	3	3	3	CONTRIBUTING.md
Is your contributions' policy publicly available?	3	3	3	CONTRIBUTING.md
Do contributors keep the copyright/IP of their contributions?	3	3	3	Project under MIT license
Does your website and documentation clearly state the copyright owners of your software and documentation?	3	3	3	LICENSE
Does each of your source code files include a copyright statement?	3	3	3	Project under MIT license
Does your website and documentation clearly state the licence of your software?	3	3	3	README.md
Is your software released under an open source licence?	3	3	3	LICENSE
Is your software released under an OSI-approved open-source licence?	3	3	3	LICENSE
Does each of your source code files include a licence header?	3	3	3	yes
Do you have a recommended citation for your software?	3	3	3	CITATION.cff
Does your website or documentation include a project roadmap (a list of project and development milestones for the next 3, 6 and 12 months)?	3	3	3	Issues
Does your website or documentation describe how your project is funded, and the period over which funding is guaranteed?	3	3	3	N/A
Do you make timely announcements of the deprecation of components, APIs, etc.?	3	3	3	We will make timely announcements
